

Heavy-Duty Assemblies

If you don't see what you need here, no problem! We can change any of the assemblies to include the length or clamp type that you require. Chances are we have already made it in the past, and if not, we are happy to discuss and create the custom solution that fits your application.

If you are uncomfortable designing a static grounding system by yourself, we can assist with a "Site Survey" assessment to help you determine the best way to provide bonding and grounding in your workplace.

Retractable Assemblies

Eliminate tangled bonding and grounding assemblies that lie on the floor and present a tripping hazard. Coiled assemblies neatly and compactly retract out of the way when not in use. The coiled plated steel cable is bright orange PVC coated for high visibility.
