

# POWER DISTRIBUTION BOX

**A FAMILIAR PRODUCT REDESIGNED FOR THE MODERN JOBSITE!**

**PROUDLY MADE IN CANADA** 🍁

The OnSite PDB is an innovative approach to temporary power distribution in an area that has failed to evolve over the years. We have designed this unit to provide **quick and convenient access to electrical components for service and maintenance while maintaining a high level of portability and usability.**

Modern jobsites are fast-paced and require equipment to be **mobile, versatile and easy to repair.** Traditional power distribution boxes fail to meet that criteria and cause additional hassle on the jobsite. The Lind Equipment Onsite PDB changes all that with innovations never seen before in this industry.

## KEY FEATURES

- *Integrated GFCI Receptacles*
- *Dedicated Quad USB-A receptacle for charging mobile devices.*
- *LED Indicator Light on the 50A Input Receptacle.*
- *Receptacles angled at 45° and protected with weather-proof covers.*
- *Internal components are located under a false top for easy access.*
